WHY INVEST IN SINGAPORE NOW?

Headed into 2023, markets were rattled over global recessionary concerns. When February 2023 approached, the focus shifted to overheating and stickier-than-expected inflation. Just three weeks ago, a series of regional bank failures and takeover of Credit Suisse by UBS had investors on edge regarding credit crunch fears and stress in the banking system. With new headwinds to growth, concerns of a steeper slowdown in global economy have resurfaced once again. We saw rising funding costs, ballooning money market funds, and a rally in gold (an asset class commonly perceived as a recessionary hedge). In the United States (US), regulators have swiftly rolled out measures to address potential liquidity pressures in the banking sector and to restore investors' confidence.

Despite Singapore's sensitivity to global growth from its export-oriented nature, we are moderately positive on Singapore equities due to its defensive characteristics and attractive valuations.

Greater volatility is expected to unfold in the coming months. History has taught us not to time the market. Against the volatile macro backdrop, investors should stay defensive and diversified, while taking into consideration their risk appetite and time horizon.

The Lion-OCBC Securities Singapore Low Carbon ETF provides easy access to 50 leading Singapore companies with lower carbon footprint. It is suitable for investors who wish to stay defensive and diversified, while also supporting a lower carbon Singapore economy.

HOW DOES THIS ETF COMPARE WITH OTHER SINGAPORE-FOCUSED ETFs?

The Lion-OCBC Securities Singapore Low Carbon ETF tracks the iEdge-OCBC Singapore Low Carbon Select 50 Capped Index (“the Index”), which aims to track performance of the top 50 companies by free-float market capitalisation that are representative of Singapore’s real and financial economy, with a focus on index decarbonisation through reduction of the Index’s Weighted Average Carbon Intensity (WACI). As shown in Figure 2, the Index has a much lower WACI compared with other Singapore benchmarks.

Between 28 April 2022 (ETF’s listing date) and 31 March 2023, the Lion-OCBC Securities Singapore Low Carbon ETF demonstrated comparable performance⁵ (Figure 3) with other Singapore-focused ETFs such as the SPDR STI ETF and Nikko AM Singapore STI ETF, while cumulatively outperforming⁶ the Xtrackers MSCI Singapore UCITS ETF as of 31 March 2023.

The Lion-OCBC Securities Singapore Low Carbon ETF offers investors comparable performance but with a much lower carbon footprint. Do good. For your portfolio and our planet.
